RB-WATCHER

A NEW ERA FOR INSPECTION AND SURVEILLANCE TASKS

RB-WATCHER is revolutionizing the field of inspection and surveillance by autonomously executing a wide range of tasks. This includes patrolling predefined areas, detecting objects and individuals (such as intruders), and identifying fire hazards. A standout feature of **RB-WATCHER** is its ability to detect and report thermal anomalies, providing crucial data for early warning and prevention measures. All gathered information is processed by the robot and dispatched in real time to the control center, enabling prompt and informed decision-making. This capability is versatile and can be applied across various industries, enhancing security and inspection processes significantly.
